

## Fire Patrol

Highly maneuverable & economical.

- ✦ Ford F-450 two-door 4 WD chassis; optional four-door
- ✦ Darley 1.5 AGE 20 H rear-mounted auxiliary pump
- ✦ 250 gallon poly water tank
- ✦ Chemtronics CF Series Education foam proportioner
- ✦ Receptacle for a five gallon foam container
- ✦ 1.5" upper left, rear compartment pre-connect
- ✦ 1" hosebed pre-connect
- ✦ 1.5" rear discharge
- ✦ Booster reel in open, rear compartment
- ✦ Long-handled tool compartment above left, rear wheels
- ✦ Aluminum body with open, rear compartment design

- ✦ Ford F-550 four-door 4 WD chassis; optional two-door
- ✦ Darley 2.5 AGE 26 LD rear-mounted auxiliary pump
- ✦ 250 gallon poly water tank with 20 gallon integral Class A foam tank
- ✦ Foam Pro 1600 foam system
- ✦ Two 1.5" rear discharges
- ✦ Booster reel in hosebed
- ✦ Aluminum body with enclosed, rear-pump compartment
- ✦ Roof compartments on each side of hosebed for long-handled tools
- ✦ Rear compartments with slide-out drawer
- ✦ Traffic director
- ✦ Aluminum hosebed cover

## Brush Patrol

Preferred for its maneuverability and simple operation.

## Mini Wolf

At home in the city or in the wild.

- ✦ Ford F-550 Chassis, optional two-door or four-door
- ✦ Full structural fire fighting package
- ✦ Rosenbauer NH 500 GPM pump with simultaneous high and normal pressure
  - ✦ See back cover for more information on Rosenbauer NH fire pumps
- ✦ Cross-mount pump configuration
- ✦ Pump-n-Roll in both forward and reverse
- ✦ 300 gallon water tank with 30 gallon foam cell
- ✦ Rosenbauer Fix Mix foam system produces CAFS-like foam
- ✦ Bumper Turret
- ✦ In-Cab Controls
- ✦ 3/4" booster reel
- ✦ Optional pre-connects and hosebed storage

Forestry

Wildland 34

- ▣ International 7400 four-door 4 WD chassis, 330 HP
- ▣ Industry exclusive **Flex-Star Off-Road Body Mounts**
  - ▣ Allow 18" of body/pumphouse to frame flexing with minimal body stress
- ▣ Darley JMP 500 GPM two-stage pump
- ▣ Darley 1.5 AGE auxiliary pump
- ▣ 500 gallon booster tank
- ▣ Foam Pro 1600 foam system
- ▣ Removable 20 gallon foam cell for ease of service
- ▣ Two bumper discharges with three hosewells
- ▣ Galvaneal steel body
- ▣ Extreme-duty, tow-eye assemblies
- ▣ 20' ladder and hard suction storage
- ▣ All LED light package
- ▣ Aluminum hosebed cover with storage for two backboards

- ✘ International 7400 four-door 4 WD chassis, 330 HP engine; option 2 WD
- ✘ Allison 3000 EVS automatic transmission
- ✘ Hale MG 750 GPM PTO driven pump with Pump-n-Roll capabilities
- ✘ Hale HPX100-BD26 auxiliary pump with in-cab control
- ✘ 500 gallon poly water tank with 25 gallon integral Class A foam tank
- ✘ Foam Pro 2001 foam system
- ✘ Two hosebed pre-connects
- ✘ Booster reel in hosebed
- ✘ Roof compartments on each side of hosebed for long-handled tools
- ✘ Running board storage compartments
- ✘ Aluminum hosebed cover

## Brush Engine

Also serves as a second unit out and back-up.

To learn more about Rosenbauer Wildlands, visit [www.rosenbaueramerica.com](http://www.rosenbaueramerica.com).

- ✧ International 4x4 four-door chassis, 310 HP engine
- ✧ Rosenbauer NH1000 pump with Fix Mix Foam System (CAFS-like foam) (See back cover)
- ✧ Urban interface Class A pumper
- ✧ Front Turret 100 GPM at 600 psi
- ✧ In-cab controls for pump, foam control, turret control, with Pump-n-Roll
- ✧ Rear-mount pump with simultaneous high pressure & normal pressure operation
- ✧ Pump-n-Roll operation in forward and reverse gear
- ✧ Underbody spray nozzles; optional body spray protection
- ✧ Extruded aluminum body
- ✧ 500 to 750 gallon booster tank
- ✧ Electric rewind reels in step on each side with 150' of 1" high pressure booster hose
- ✧ Aluminum hosebed cover

## Timberwolf

Urban Interface  
Class A Pumper

# Urban Interface Class A Pumper

- ✦ International 4x4 four-door, 310 HP engine; optional two-door and 330 HP
- ✦ Rosenbauer rear-mounted NH Pump with Max CAFS (Compressed Air Foam System)
  - ✦ See back cover for more information on Rosenbauer NH fire pumps
- ✦ Rosenbauer Fix Mix high pressure foam system
- ✦ Foam Pro 2002 normal pressure foam system
- ✦ Front turret 100 GPM at 600 psi
- ✦ In-cab controls for pump, foam control, turret control, with Pump-n-Roll
- ✦ Aluminum body
- ✦ Aluminum hosebed cover

## ULTRA HIGH PRESSURE SYSTEM (UHPS)

Rosenbauer's UHPS is ideal for forest fires, first responders, car fires, and small gasoline and alcohol fires. Developed in a joint project with the US Air Force, the UHPS is a proven and extensively tested system that provides big fire fighting capability in a small package.

Ultra high pressure produces very fine water particles providing greater surface coverage. A full jet stream penetrates flames and attacks the source of the fire using continuous extinguishing or in short burst with adjustment between jet and spray patterns. Minimum water demand helps the UHPS adapt well to smaller vehicles in various configurations on a wide array of apparatus such as the Gator or Polaris 6x6, pick-up trucks, apparatus compartments, or by helicopter drop.

System: Briggs & Stratton 16 HP Vanguard gasoline engine  
Six-piston high pressure brass pump, oil bath lubrication  
Preset output of 10 GPM at 1450 psi, requires no adjustment  
Fully automatic settings from 0.1% to 6% for all foam types  
Five gallon foam tank  
Manual or electric hose reel with 200' of lightweight high pressure hose  
Nozzle with infinite adjustment jet to spray, foam barrel attachment  
Water capacity up to 300 gallons with slide-in skid units, 50-80 gallon for ATV

## ROSENBAUER NH SERIES FIRE PUMPS

Rosenbauer fire pumps are the most versatile fire pump systems available. The highest quality materials and workmanship along with excellence in engineering design are employed in the creation of every pump system. With over 90 years of pump manufacturing experience, Rosenbauer's dependable, efficient fire pumps are ready to perform.

Rosenbauer 500, 750, 1000, 1250 GPM Multi-Stage Fire Pumps

- Capable of high flow and high pressure simultaneously
- Capable of foam and water at same time at either pressure
- Outstanding PTO pump-n-roll operation, both forward and reverse gear
- CAFS-like foam with high pressure (600 psi) Fix Mix foam system
- Maintenance-free, rotating mechanical seals
- Quiet, efficient operation

Automatic priming system

- Fail-safe mechanical operation
- Engages automatically at pump start or when water pressure is lost
- Disengages when pump achieves prime
- Piston priming pump is driven from the main pump shaft
- Internal lubrication of all moving parts

## FOX HIGH PERFORMANCE PUMP

With excellent performance and straightforward operation, the Fox pump is a high output system for applications where compact design and portability are key.

The latest generation Fox pump is powered by a BMW 1200cc motorcycle engine with guaranteed reliability in extreme firefighting conditions. The fully automatic priming pump is built to last, unaffected by contaminated water, extended use, or relay operations. The pressure governor automatically maintains constant pressure regardless of water flow, and the optional mechanical thermal heat protection and cavitation alarm offer maximum protection to the pump.

Engine: BMW two-cylinder four-stroke 65 HP, fuel injection, electric start, engine-mounted cooling fan  
Pump: Single-stage aluminum centrifugal pump, automatic priming piston pump, stainless steel pump shaft, maintenance-free seals  
Controls: LED monitor for engine and pump operation, pressure governor, optional engine over heat and cavitation alarm  
Output: 425 GPM at 150 psi, 500 GPM at 90 psi
